Bayview GO Bus Service

A local GO corridor along Bayview Avenue between Toronto and Richmond Hill, initially operated under contract by Travelways and later directly by GO. The surviving 2003 timetable calls it Bayview GO Bus Service and labels the sheet Table 58; that table number is not asserted as a modern public GO route number. It had a separate local fare and transfer arrangement from most GO commuter routes.

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1972-01**

  The Richmond Hill-Toronto corridor via Bayview begins under Travelways operation for GO. Early service also reaches downtown Toronto. [S4]

- **1974**

  Bayview service gains the regional terminal at Finch subway station as a Toronto connection. [S4]

- **1984-01-28**

  GO takes direct operation of the former Travelways Bayview and Uxbridge corridors and hires its first bus drivers. [S4]

- **by 2003-06-28**

  The original local schedule links Finch and Richmond Hill via Bayview, John, Highway 7, 16th Avenue and Major Mackenzie. The northbound sheet also times S. Taylor Mills before Bayview Plaza; the southbound sheet does not. [S1] [S2]

- **2003-08-30**

  GO's Bayview and Yonge C services transfer to York Region Transit. The TTS retrospective gives August 30 and says initial routing and service levels were retained; the Bayview successor is YRT 91. [S4] [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.

Evidence notes - continued

- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- No original early-1970s timetable has been recovered here, so the downtown-era all-stop pattern is not reconstructed.
- The exact historical Bayview Plaza and S. Taylor Mills bus-stop locations remain unresolved; do not substitute a modern business with the same name.
- The August 30, 2003 takeover day is from a detailed secondary retrospective; the original 2003 schedule directly establishes the service shortly before transfer.
- Table 58 is a source identifier, not evidence that this should be filed as contemporary GO route 58.
