Yonge C / North Yonge Local GO Bus Service

GO's local Yonge Street service between Finch and Richmond Hill, descended from the TTC's North Yonge route. Its surviving 2003 schedule is Table 52 and is unrelated to the later Oshawa/York University route 52. It used local fares and accepted local-transit transfers, while prohibiting journeys entirely at or south of Steeles.

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1976-11-28**

  GO replaces the TTC's North Yonge service with local Yonge C from Finch to Richmond Heights Plaza. The detailed TTC history gives November 27, 1976 as its final operating day; the GO retrospective gives November 28 for the transfer. [S3] [S4]

- **by 2003-01-04**

  The original northbound timetable shows Finch-Steeles-Royal Orchard-Garden-Baif-Harding-Major Mackenzie-Bernard Terminal. Table 52 here is Yonge C, not the later Highway 407 East table. [S1]

- **by 2003-06-28**

  Southbound weekday service includes both Bernard Terminal departures and extra Harding starters. The latter are timed at Harding, then Major Mackenzie, then Harding again before continuing south. [S2]

- **2003-08-30**

  The Yonge C local operation transfers from GO to York Region Transit along with Bayview; the local Yonge successor is associated with YRT 99. The separate Newmarket B service remains GO-operated at this point. [S4] [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The move from Richmond Heights Plaza to Bernard Terminal is bounded by the original 2003 snapshot but its exact date has not been established here.

Evidence notes - continued

- The precise streets used by the Harding starter loop are not mapped; only its printed timing-point sequence is retained.
- Some secondary page headings or summary bullets say 1977, but their detailed dated entry and the dedicated GO history agree on November 27/28, 1976; the detailed entries are used.
- This is a named legacy corridor, not a predecessor geography of modern GO route 52. Newmarket B and its eventual route62 designation are documented separately.

The original explicitly times a starter at Harding (e.g. 06:25), Major Mackenzie (06:27), then Harding again (06:28). The duplicate stop is intentional and documents the printed sequence; the precise loop streets are not established and must not be invented.
