17 Waterloo / Hamilton

A Waterloo-Kitchener-Guelph-Hamilton connection with a later seasonal Burlington branch.

6	2023 - 2026	122
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 17 | 17 - Hamilton GO | Scheduled 22 Oct 2026 - 27 Nov 2026; feed captured 23 Oct 2026

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2023-04-08**

  The launch timetable took effect, with weekday service beginning the following Monday. [S1]

- **2023-04-10**

  The new hourly weekday Waterloo-Hamilton route began. [S2] [S3]

- **2025-04-05**

  Seasonal weekend branch 17B began Waterloo-Burlington service for Niagara connections; its announced season ended 24 August. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- Summer 17B may be absent from autumn GTFS snapshots.
- Any later seasonal revival requires independent dates.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
