20 Milton / Oakville

A former weekday Milton-Oakville Lakeshore connection, distinct from the old Hamilton route 22 and the route 22 introduced in 2024.

6	2009 - 2019	93
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 20 | 20 - Oakville GO | Scheduled 4 Jan 2016 - 5 Jan 2016; feed captured 11 Jan 2016

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-06-28**

  GO introduced a Milton-Bronte GO connection, an earlier corridor configuration. [S1]

- **2009-09-05**

  Route 20 connects Milton GO with Oakville GO via Bronte Road / Highway 407 and Sheridan College. [S2]

- **2019-01-05**

  The table also includes Trafalgar Road / Highway 407 and lists ten weekday trips each way. [S3]

- **2019-06-29**

  Route 20 was withdrawn in the June changes. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The number used at the June 2008 Milton-Bronte launch is not established.
- The June 2019 withdrawal date is from contemporary secondary reporting; an archived original GO notice would improve the record.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.

Evidence notes - continued

- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
