Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1976-02-15**

  GO took over the Milton-Streetsville-Union corridor from Gray Coach. [S1]

- **1981-10-26**

  Milton trains began, changing the role of parallel buses. [S1]

- **2007-09-01**

  The route-21 series includes both local Milton-Union buses and faster Meadowvale-Union patterns. [S2]

- **2014-04-05**

  The map documents branches 21A/B/C/D/E/F/G/H/J/K/L/M/N/P/R/T/V. [S3]

- **2023-04-08**

  Daytime 21A/B/C were reorganized toward Oakville, Clarkson and Port Credit; some early and late route 21 buses still served Union. [S4] [S5]

- **2024-04-27**

  Regular Union service returned; the Milton-Oakville branch became route 22. [S6] [S7] [S8]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.

Evidence notes - continued

- The 1976 takeover does not establish when number 21 was adopted.
- A map must not combine every short turn into one imagined through trip.
- Dates for all intervening branch introductions and withdrawals are not established.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
