Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1977-01-05**

  GO added a Milton / Streetsville-York Mills service, an early corridor predecessor. [S1]

- **2008-06-28**

  The table documents 27 and 27A/B/D/E/F serving distinct Finch, York Mills and Meadowvale patterns. [S2]

- **2016-04-02**

  Weekend service was added. [S3]

- **2019-01-05**

  The table uses Milton GO and Derry / Ninth Line in place of the older Main / Martin and Derry / Winston Churchill timepoints. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The number 27 adoption date is unknown.
- The 2008 business-park variants 27A/E/F are documented but not individually reconstructed here; dated GTFS can supplement them.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.

Evidence notes - continued

- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
