37 Orangeville / Brampton

A Highway 10/Hurontario train-feeder corridor, originally numbered 41, with a former midday Bramalea branch.

24	2009 - 2026	651
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 37 | 37 - Orangeville | Scheduled 22 Oct 2026 - 27 Nov 2026; feed captured 23 Oct 2026

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1999-01-04**

  GO introduced Orangeville-Caledon-Victoria-Snelgrove-Brampton train connections. [S1]

- **2008-04-28**

  Former 41 Orangeville was renumbered 37; an additional weekday trip each way was also introduced. [S2]

- **2009-10-31**

  37 mainline serves Brampton GO; midday 37A serves Trinity Common and Bramalea. [S3]

- **2011-12-31**

  All six weekday trips each way in this issue use Brampton GO; the earlier Bramalea branch is absent. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- See the separate 41 entry for the former number.
- The old 37A withdrawal falls between the 2009 and December 2011 snapshots; the precise date is unverified.
- Later weekend/local-branch chronology requires additional timetables.

Evidence notes - continued

- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
