38 Bolton / Malton; formerly Highway 27 / North York

The former 42 Bolton family had separate Highway 50-Malton and Highway 27-North York branches. The latter ended in 2019; a proposed total cancellation was revised to retain reduced Malton service.

documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 38 | 38 - Bolton | Scheduled 22 Oct 2026 - 27 Nov 2026; feed captured 23 Oct 2026

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **1999-01-04**

  GO introduced a Bolton-Nobleton-Kleinburg-Humber College-North York corridor. [S1]

- **2008-04-28**

  Former 42 Bolton was renumbered 38. [S2]

- **2008-08-30**

  The original 38A table shows the Highway 27 branch, two peak-direction trips each way. [S3]

- **2008-12-01**

  A separately dated table documents 38 via Highway 50 to Malton GO. [S3]

- **2018-09-01**

  Both 38 and 38A remain in the published booklet. [S4]

- **2019-06-29**

  38A was eliminated. The planned total 38 cancellation was revised. [S5]

- **2019-07-02**

  Reduced 38 retained two morning and two afternoon/evening trips, initially as an interim arrangement. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.

Evidence notes - continued

- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- See the separate 42 entry for the former number.
- Route 38 survived the 2019 changes; do not record a completed total cancellation.
- The Highway 50 branch's first introduction is unverified; December 2008 is a documented snapshot.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
