40 Hamilton / Richmond Hill (formerly Pearson Airport Express)

An airport express that began between Square One, Pearson and Richmond Hill Centre, became a two-terminal Pearson-Richmond Hill shuttle, and later expanded west to Hamilton. Its history includes short express branches and, in 2026, Humber and Unionville service.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-04-26**

  Route 40 begins with half-hourly Square One-Pearson service; alternate trips continue to Richmond Hill Centre, giving that segment hourly service. [S9]

- **by 2010-02-01**

  The original timetable documents an hourly Square One-Pearson-Richmond Hill pattern seven days a week. [S2]

- **by 2011-01-01**

  The route has been shortened to Pearson Terminal 1-Richmond Hill Centre; Square One is absent from the effective January 1 timetable. [S3]

- **2015-09-05**

  Route 40 expands to Hamilton and takes over the former 47J Hamilton-Square One express service; GO's ridership report gives this exact date. [S4]

- **2017-12-30**

  Highway 407 Bus Terminal opens. The January 2019 route 40 timetable confirms the new terminal, Dixie and Renforth as main-route stops. [S5] [S6]

- **by 2019-01-05**

  40A runs Hamilton-Square One express, bypassing Trafalgar/407; 40B provides a Richmond Hill Centre-Pearson short express that bypasses Highway 407 terminal. [S6]

- **2026-01-03**

  The timetable includes 40H and 40M via Humber Polytechnic North Campus, with 40M continuing to Unionville. Dundas/407 is also on the main route by this snapshot. This change accompanies the withdrawal of routes 54 and 66. [S7] [S8]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The exact date of the initial Square One withdrawal has not been located; January 1, 2011 is the verified timetable snapshot.
- The exact first dates of Dixie, Renforth, Dundas/407 and each express suffix require additional change notices. Current and historical GTFS snapshots supply additional full-stop patterns.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
