45 Streetsville / York University; later Mississauga / Markham

A direct Mississauga-York service that bypassed Bramalea on its principal patterns. It later terminated at Highway 407 and gained a Unionville branch before being discontinued in 2023.

18	2006 - 2022	126
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 45B | 45B - Unionville GO | Scheduled 27 Jan 2022 - 28 Jan 2022; feed captured 8 Mar 2022

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **by 2006-12-30**

  The unnumbered route-column predecessor in Table 46 connects Streetsville, Square One and York University; 53xxx trip identifiers in this timetable are not evidence of a separate public route 53. [S1]

- **by 2011-12-31**

  Public routes 45 and 45A are printed explicitly: Streetsville-Square One-Keele-York and a Square One short working. Both bypass Bramalea. [S2]

- **2015-09-05**

  Erin Mills Transitway Station opens to GO service; it is included on route 45 in the September 2018 original. [S3] [S4]

- **by 2018-09-01**

  Main 45 serves Erin Mills and continues to York via Keele. Unlike the stopping 46/47/48 patterns, 45 and 45A bypass the newly opened Highway 407 Bus Terminal. [S4]

- **2019-01-05**

  GO leaves York University campus; later 2019 route 45 timetables terminate at Highway 407 Bus Terminal. [S5] [S6]

- **by 2022-06-25**

  45B is a Streetsville-Erin Mills-Square One-Highway 407-Richmond Hill Centre-Unionville through branch, bypassing Bramalea. [S7]

- **2023-04-08**

  Route 45 is discontinued in the spring service revision. [S8]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The original start date of the Streetsville service and the exact introduction date of public route number 45 have not been established.
- A secondary account places the Unionville extension in September 2020, but this dataset uses the directly verified June 2022 original instead of assigning an unconfirmed launch day.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
