60 Canada's Wonderland

Seasonal direct GO buses from York Mills and Yorkdale to Canada's Wonderland. This was the renumbered successor to route 43; later Wonderland service using other route families is a separate service.

Illustrated pattern: 60 | York Mills-Yorkdale-Wonderland | Documented 2013-05-01

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-05-04**

  The seasonal Wonderland service returned under number 60, replacing number 43. [S1]

- **2010-05**

  Weekend/holiday service resumed May 2; daily operation followed May 20. [S2]

- **2013-05-01**

  The original seasonal timetable shows 60 from York Mills via Yorkdale and 60A starting at Yorkdale. [S3]

- **2019**

  The 2019 service-change account states that route 60 would not return and directs riders to YRT route 20. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The exact final operating day of the last season has not been established. Route 43 has its own folder for the earlier number.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
