documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 63 | 63 - King- Keele St At Burton Grove | Scheduled 4 Jan 2016 - 5 Jan 2016; feed captured 11 Jan 2016

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2011-09-03**

  The Barrie timetable explicitly identifies King City-Toronto buses as route 63. [S1]

- **2023-01-07**

  Route 63 remained in the Barrie schedule, serving King City, Maple, Rutherford and Union. [S2]

- **2024-01-06**

  The January timetable still labels the early King City-Union trip 63. [S3]

- **2024-04-27**

  The corresponding King City-Union trip is labelled 65A in the April timetable, establishing the renumbering between these schedule editions. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The date on which King City buses first acquired number 63 has not been established.
- Earlier Table 63 references for Newmarket B express service are not automatically treated as this route or as proof of a different route 63.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.

Evidence notes - continued

- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
