Illustrated pattern: 66A | 66A - East Gwillimbury GO | Scheduled 27 Jan 2022 - 28 Jan 2022; feed captured 8 Mar 2022

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **by 2011-03-13**

  The original timetable shows Newmarket Bus Terminal-Highway 9/400-Major Mackenzie/400-Yorkdale, with a Keele/401 branch. [S1]

- **2012-09**

  Five weekday Newmarket-Yorkdale trips were added. [S2]

- **2019-01-05**

  The documented northern terminus is East Gwillimbury GO; 66 and 66A still run to Yorkdale. [S3]

- **2023-04-08**

  The documented route ends at Highway 407 Bus Terminal and uses the Davis/Eagle street stop in Newmarket. [S4]

- **2026-01-03**

  Metrolinx discontinued route 66. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The precise dates of the East Gwillimbury extension and Yorkdale-to-Highway-407 terminal change have not been pinned down; the dated timetables establish their presence.

Evidence notes - continued

- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
