Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2009-06-27**

  The original timetable shows Barrie Bus Terminal-Barrie South-Bradford-Holland Landing-Newmarket, including a Bradford short service. [S1]

- **2012-06-23**

  Allandale Waterfront appears in the route 68 timetable and corridor diagram. [S2]

- **2018-01-02**

  Barrie train expansion was accompanied by reworked connecting buses, including Aurora connections. [S3]

- **2019-01-05**

  The timetable documents the Barrie-Aurora corridor through East Gwillimbury and Newmarket GO. [S4]

- **2023-01-07**

  Branches serving Barrie and its rail connection points remain in the original Barrie schedule. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The historical road names Highway 11 and Yonge Street refer to the same older north-south corridor in several timetable labels.

Evidence notes - continued

- Branch suffixes have changed and been reused. Do not apply present-day 68A/68B meanings to the 2009 table.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
