69 Sutton-Newmarket; later Aurora-Newmarket

Number 69 has two distinct documented uses: the former Lake Simcoe/Sutton rural service and a later local Newmarket-Aurora rail connector. The two eras must be mapped separately.

documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 69 | Sutton era: Beaverton-Newmarket | Documented 2008-11-01

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-11-01**

  The Sutton timetable shows full Beaverton-Newmarket route 69, Sutton short branch 69A, Keswick short branch 69B, and Keswick-East Gwillimbury-Union 69C. [S1]

- **2011-12-31**

  The last recovered full Sutton-era timetable retains these branches. [S2]

- **2012-09-01**

  Final day of the Sutton-era route; its replacement network included YRT 50 and GO routes 67 and 80. [S3] [S6]

- **2018-01-02**

  Number 69 was reused for weekday Newmarket Bus Terminal-Aurora GO service formerly part of route 65. [S4]

- **2019-01-05**

  The Barrie timetable explicitly lists the new Aurora-Newmarket route 69. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The exact final date of the second, Aurora-Newmarket use of number 69 has not been confirmed. It is absent from the later recovered 2022/2023 network snapshots.

Evidence notes - continued

- The two eras are separated by more than five years and are not a continuous route with a minor extension.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
