70 Uxbridge-Stouffville rail connections

Train-connecting services north of Unionville/Mount Joy, including Uxbridge, Goodwood, Stouffville and the station first called Lincolnville and then Old Elm. Route 71 contains the associated Union-bound bus service.

32	2016 - 2026	600
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 70 | 70 - Unionville GO | Scheduled 22 Oct 2026 - 27 Nov 2026; feed captured 23 Oct 2026

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Contents

Use the clickable entries or PDF bookmarks to jump to a date, branch or direction. Pattern counts include separate directions, stopping patterns and boarding restrictions.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **by 2016-01**

  The original archived GTFS contains route 70 and branches 70A, 70B and 70E. [S1]

- **2019-08-31**

  The original timetable documents 70 Uxbridge-Stouffville-Unionville and shorter branches including 70B and 70D. [S2]

- **2021-10-16**

  Lincolnville GO was renamed Old Elm GO; the name change preceded the physical station relocation. [S3]

- **2023-01-07**

  The timetable uses the Old Elm name while serving the original Bethesda Road station site. [S4]

- **2023-10-17**

  Old Elm service moved to the replacement station southwest of the original site. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The first date the separate route 70 number was introduced has not been located. Earlier Uxbridge connecting buses in Table 71 should not automatically be relabelled 70.
- The 2016 and later GTFS snapshots preserve additional exact branch and local-stop variants.

Evidence notes - continued

- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.

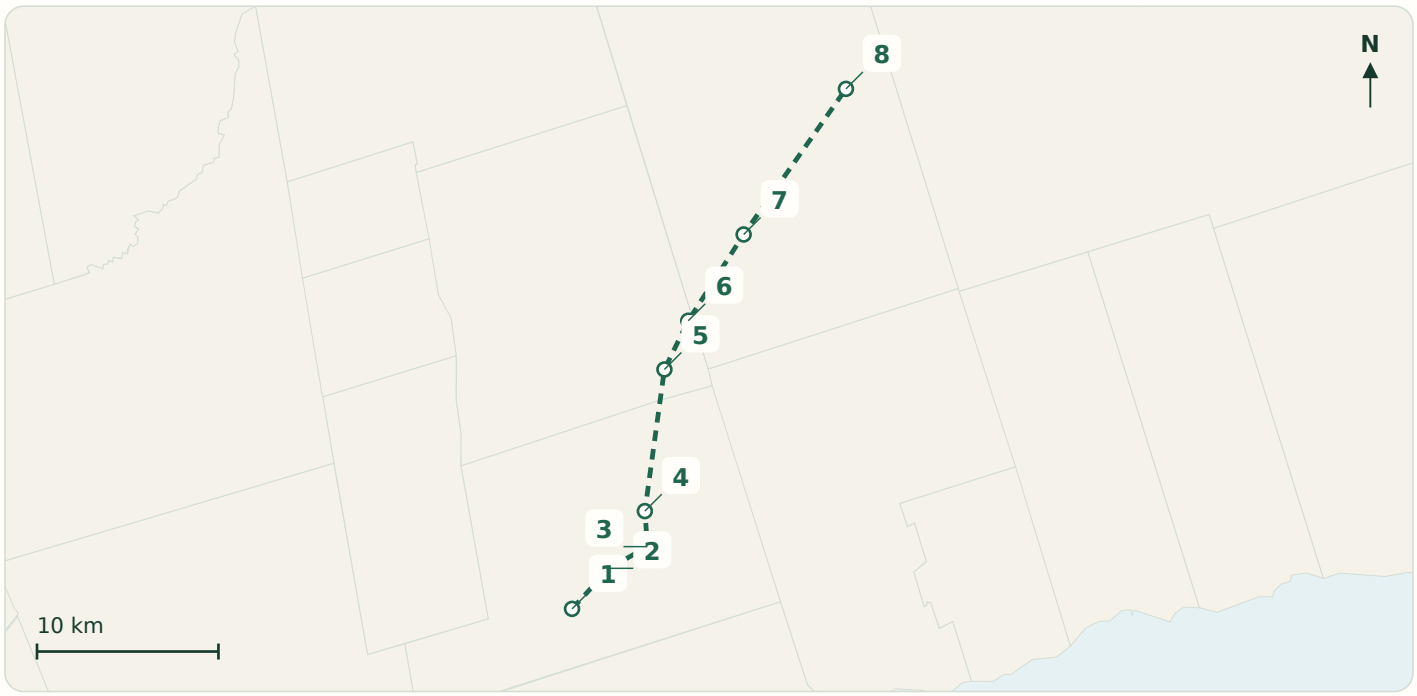

HISTORICAL RECONSTRUCTION | PATTERN 01 OF 32

70 | Unionville-Uxbridge full northern connector

Documented: by 2016-01 | Direction: northbound

DOCUMENTED MAJOR STOPS / TIMING POINTS 8 stops

Sources: [S1]

Dashed line: schematic stop connections, not a street-by-street alignment. Stop areas do not establish exact historical platforms.

Major points selected from the original route_variant 70 GTFS stop sequence. The 2019 cover map still depicts this corridor, but the recovered weekday table mainly lists 70B/70D; this full trip is therefore dated to the earlier feed.
