71 Stouffville-Toronto

The Stouffville corridor's Union-bound bus family, historically extending to Uxbridge. Short workings, station bypasses and express variants changed with rail service, with route 70 providing many northern train connections.

documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 71 | 71 - Union Station | Scheduled 22 Oct 2026 - 27 Nov 2026; feed captured 23 Oct 2026

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2006-12-30**

  The recovered timetable documents Uxbridge-Goodwood-Stouffville-Markham-Union bus trips and shorter train-connecting trips. [S1]

- **2011-12-31**

  Lincolnville is included in the original Stouffville timetable, replacing the earlier north-Stouffville street timing point for relevant services. [S2]

- **2019-08-31**

  Routes 70 and 71 share the timetable; the 71 family includes multiple Union-bound and short variants. [S3]

- **2021-10-16**

  Lincolnville GO was renamed Old Elm GO. [S4]

- **2023-10-17**

  Buses and trains began serving the relocated Old Elm station. [S5]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The 2006 table contains several express and short-working combinations without sufficiently clear public suffixes; only the explicitly supported patterns are diagrammed.

Evidence notes - continued

- Earlier Uxbridge services to Scarborough Centre or downtown Toronto require separate historical timetables before assigning them a modern route number.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.

Dashed line: schematic stop connections, not a street-by-street alignment. Stop areas do not establish exact historical platforms.

Verified scheduled 71E bus row in January 2023. The older 2019 cover map displays 71E but the recovered service rows do not establish operation of that branch in that edition.
