80 Pefferlaw-Beaverton

Short-lived rural connector replacing the northern end of the former Sutton route 69. It later passed to York Region Transit as route 51.

1	2012	2
documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 80 | Pefferlaw-Beaverton | Documented 2012-09-02

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Contents

Use the clickable entries or PDF bookmarks to jump to a date, branch or direction. Pattern counts include separate directions, stopping patterns and boarding restrictions.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2012-09-02**

  GO introduced route 80 between Pefferlaw and Beaverton. [S1]

- **2012-09-02**

  The launch schedule offered nine weekday trips in each direction and three on weekend days. [S2]

- **2013-02-25**

  The YRT service-change notice still refers to connections with GO route 80. [S3]

- **by 2013-09**

  The original YRT system map shows route 51 Beaverton-Pefferlaw in the former GO corridor. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The transfer to YRT occurred in 2013, after the February connection notice and by the September system map; exact final GO service date remains unverified.
- Only endpoints are securely documented for mapping.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.

Evidence notes - continued

- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.

HISTORICAL RECONSTRUCTION | PATTERN 01 OF 1

80 | Pefferlaw-Beaverton

Documented: 2012-09-02 | Direction: northbound

DOCUMENTED MAJOR STOPS / TIMING POINTS 2 stops

Sources: [S1]

Dashed line: schematic stop connections, not a street-by-street alignment. Stop areas do not establish exact historical platforms.

Endpoint-only schematic. No original full route 80 stop list has been recovered; intermediate stops or exact roadway geometry must not be inferred from the former route 69.

Ordered stops

1. Pefferlaw
2. Beaverton
