81 Port Perry-Whitby / Beaverton

Rural GO bus between Whitby GO, Port Perry and communities north to Beaverton. Timetables also show the short Port Perry-Whitby branch. Union times were connecting train times, not an 81 through bus.

documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 81 | 81 - Beaverton - Simcoe & Mara | Scheduled 2 Jan 2016 - 5 Jan 2016; feed captured 11 Jan 2016

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-11-01**

  The timetable documents Beaverton-Cannington-Sunderland-Port Perry-Whitby 81 and Port Perry-Whitby 81A. [S1]

- **2012-09**

  GO added Beaverton weekday trips and provided three weekend trips in each direction. [S2]

- **2019-01-05**

  The route continued in the original Port Perry timetable. [S3]

- **2023-04-08**

  Route 81 was discontinued. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The original launch date and every later local stop or road variation have not been recovered.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.

Evidence notes - continued

- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
