90 Lakeshore East / former Newcastle-Oshawa local

Historically included the local Newcastle-Bowmanville-Courtice-Oshawa GO feeder. That local service ended in 2020, while 90B Union-Oshawa rail-replacement service continued. The number therefore remains current.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2008-08-30**

  The Lakeshore East timetable includes the 90 Newcastle local, 90A Bowmanville short service, and 90B Union-Oshawa bus. [S1]

- **by 2016-01**

  The original GTFS contains 90, 90A, 90B, 90C and 90D patterns. [S2]

- **2020-12-05**

  Local route 90 was withdrawn after Durham Region Transit introduced overlapping 902A service; Metrolinx explicitly retained 90B. [S3]

- **by 2023-05**

  The recovered original feed retains route 90B. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The word "discontinued" in the 2020 announcement applies to the Durham local service, not the whole number 90 family.
- Special construction shuttle suffixes are service-date-specific; see current GTFS validity rather than treating them as permanent routes.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.

Evidence notes - continued

- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.
- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
