93 Durham College / UOIT-Scarborough Centre

School-oriented express bus between Scarborough Centre and the shared north Oshawa campus of Durham College and UOIT (now Ontario Tech). Some archive filenames incorrectly identify an original route 93 PDF as route 96.

documented patterns	evidence years	listed stop occurrences

Illustrated pattern: 93 | 93 - Scarborough Centre | Scheduled 4 Jan 2016 - 5 Jan 2016; feed captured 11 Jan 2016

A dated documentary atlas. Every pattern has its own numbered map and complete documented stop list. Reconstructed major-stop lists and full scheduled GTFS stop lists are identified separately.

Route history

A snapshot proves what was published at that date. It does not by itself establish when a route began or ended. Reused route numbers and changing branch suffixes remain separate dated records.

- **2009-01-03**

  The original timetable explicitly identifies the campus express as route 93. [S1]

- **2012-09**

  School service was restored with additional weekday eastbound trips. [S2]

- **2019-08-31**

  The route remained in the original school-year timetable. [S3]

- **2020-09**

  The September service-change notice states that route 93 remained suspended. [S4]

Reading the maps

- Original GO feed: all scheduled stops are retained in their source order, including no-pickup and no-drop-off restrictions. The exact service dates are printed with the pattern.
- Historical reconstruction: the list generally contains published timing points or major stops. It is complete for that documented reconstruction, and may omit intermediate roadside stops.
- Solid lines use supplied feed shapes or an explicitly labelled corridor reconstruction. Dashed lines connect stop areas schematically. Number ranges mark close or co-located stops.
- Reference coordinates do not prove an old platform location. Stops without established coordinates remain in the ordered list; a stop-order diagram is used when a geographic map cannot be drawn.
- The exact initial suspension day and formal permanent withdrawal date have not been verified. September 2020 evidence establishes continued suspension, not a newly effective cancellation.
- These are documented dated snapshots. Changes between snapshots, temporary diversions and every historical local stop have not all been recovered.
- GTFS dates identify captured feeds, not necessarily the first or last day of a route. Open a pattern to see its exact scheduled service dates. Temporary rail replacement and special-service patterns are included when present in the source.

Evidence notes - continued

- Manually reconstructed versions generally contain published timetable timing points / major stops. They must not be read as complete roadside stop inventories.
